For Grown-Ups: How to Use These Worksheets

A few minutes a day, for kindergarten and first grade. Each activity has two pages, the same facts in a new order.

Why use it

Schools teach subtraction alongside addition from kindergarten on, as taking away and as finding a missing part. Crossing out dots shows exactly what taking away means. Then the numbers stand alone, so your child moves from counting to knowing the facts within 10 (Common Core 1.OA.C.6).

What it is good for

- Taking away within 5 by crossing out dots.
- Facts within 5, then starting from 6 to 10.
- Mixed facts, including taking away 0 and taking a number from itself.

How to use it

1. On pages 1 and 2, your child crosses out the dots taken away and counts what is left.
2. On the number pages, counting back on fingers is fine at first.
3. Ask which addition fact helps: 7 − 3 is 4 because 3 + 4 is 7.
4. Check with the answer key. Each red number sits where your child writes it.

> **Try saying:** “You had 5 and took away 2. How many are left? How do you know?”

Tip: Taking away 0 changes nothing, and a number take away itself leaves 0. Those two rules answer many facts at once.
