

Regrouping: Adding With Blocks

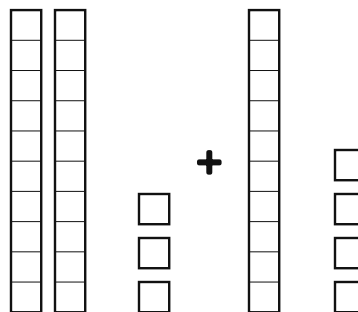

1 / 6

Put the blocks together. Ten units make a rod: trade them, then write the sum.

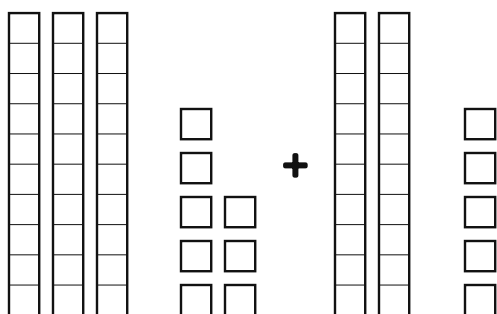

$$46 + 37 = \boxed{}$$

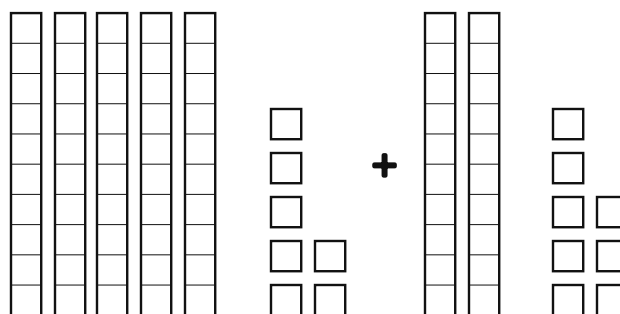

$$23 + 14 = \boxed{}$$

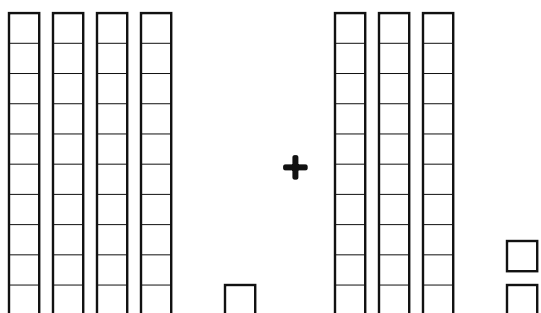

$$38 + 25 = \boxed{}$$

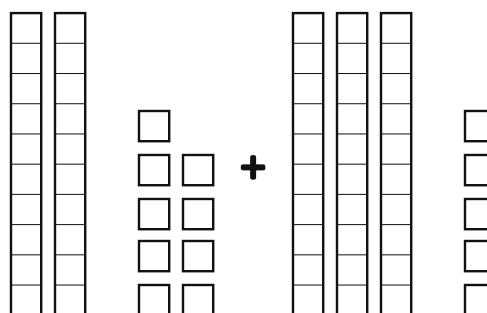

$$57 + 28 = \boxed{}$$

$$41 + 32 = \boxed{}$$

$$29 + 35 = \boxed{}$$

Regrouping: Subtracting With Blocks

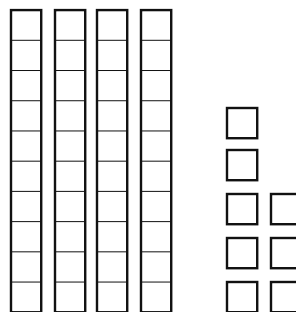

3 / 6

Cross out the blocks you take away. If there are too few units, trade a rod for ten.

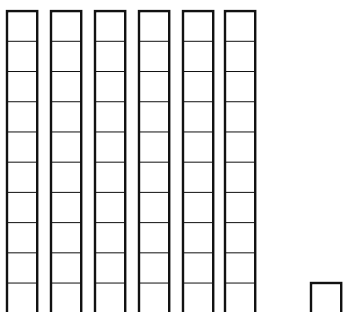

$$52 - 27 = \boxed{}$$

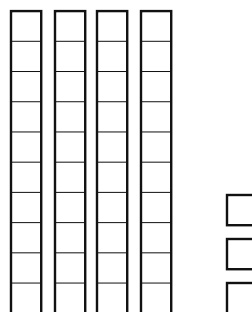

$$48 - 13 = \boxed{}$$

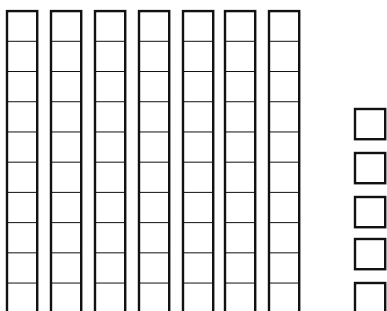

$$61 - 34 = \boxed{}$$

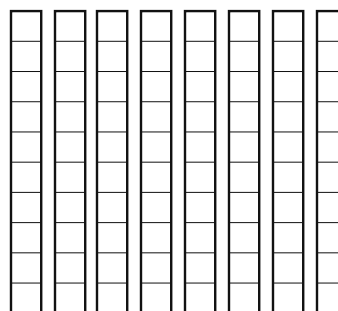

$$43 - 19 = \boxed{}$$

$$75 - 42 = \boxed{}$$

$$80 - 36 = \boxed{}$$

Regrouping: Answer Key

5 / 6

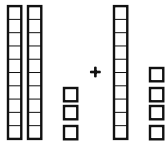

For the grown-up. Answers are in red; trade marks a problem that needs one.

Page 1

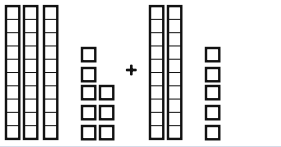

$$46 + 37 = \boxed{83} \text{ trade}$$

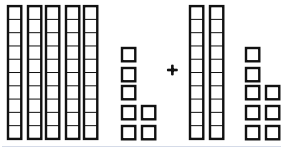

$$23 + 14 = \boxed{37}$$

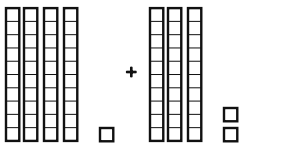

$$38 + 25 = \boxed{63} \text{ trade}$$

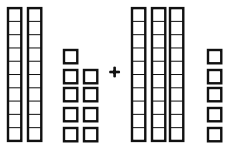

$$57 + 28 = \boxed{85} \text{ trade}$$

$$41 + 32 = \boxed{73}$$

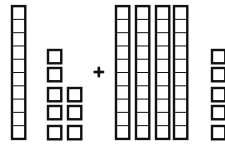

$$29 + 35 = \boxed{64} \text{ trade}$$

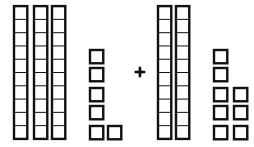

Page 2

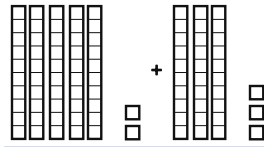

$$18 + 45 = \boxed{63} \text{ trade}$$

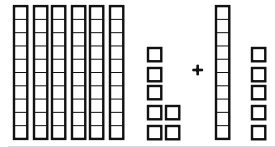

$$36 + 28 = \boxed{64} \text{ trade}$$

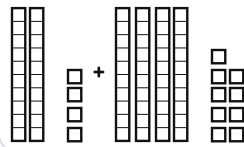

$$52 + 33 = \boxed{85}$$

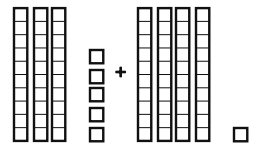

$$67 + 15 = \boxed{82} \text{ trade}$$

$$24 + 49 = \boxed{73} \text{ trade}$$

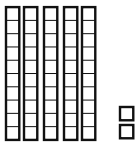

$$35 + 41 = \boxed{76}$$

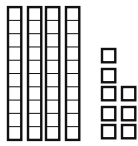

Page 3

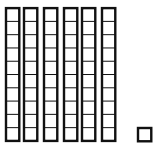

$$52 - 27 = \boxed{25} \text{ trade}$$

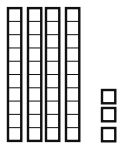

$$48 - 13 = \boxed{35}$$

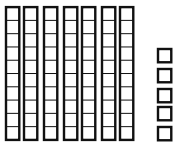

$$61 - 34 = \boxed{27} \text{ trade}$$

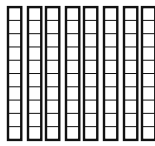

$$43 - 19 = \boxed{24} \text{ trade}$$

$$75 - 42 = \boxed{33}$$

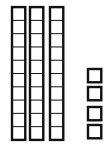

$$80 - 36 = \boxed{44} \text{ trade}$$

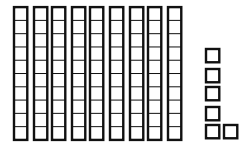

Page 4

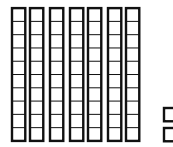

$$34 - 19 = \boxed{15} \text{ trade}$$

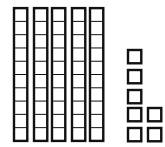

$$96 - 54 = \boxed{42}$$

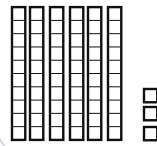

$$72 - 45 = \boxed{27} \text{ trade}$$

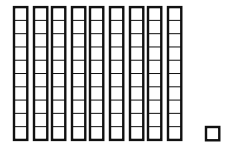

$$57 - 33 = \boxed{24}$$

$$63 - 28 = \boxed{35} \text{ trade}$$

$$91 - 47 = \boxed{44} \text{ trade}$$

For Grown-Ups: How to Use These Worksheets

6 / 6

One problem at a time, with blocks or the mat beside the sheet if your child wants them.

Why use it

The carried 1 in $46 + 37$ is a real rod: ten units traded for one ten. The borrow in $52 - 27$ is the same trade the other way. Seeing the trade explains the marks in the written method, which schools still teach.

What it is good for

- Two-digit adding within 100, with and without a trade.
- Two-digit subtracting, with and without a trade.
- Explaining carrying and borrowing in blocks.

How to use it

1. Adding: your child imagines the two piles pushed together, or builds them with real blocks.
2. If there are ten units or more, circle ten and draw a rod for them. Then count and write the sum.
3. Subtracting: if there are too few units to take away, cross out one rod and draw ten units.
4. Cross out the blocks you take away, then count what is left and write the difference.
5. Check with the answer key, which marks every problem that needs a trade.

Try saying: “Are there enough units? If not, which block can we trade?”

Tip: Not every problem needs a trade. Ask first, before your child starts, so they look at the ones.
