For Grown-Ups: How to Use These Cards

For third grade. Print double-sided, flipping on the long edge, so each answer is on the back.

Why use it

Every division fact is a multiplication fact read backwards, so these cards follow the same order as the multiplication cards: the 2s, 5s and 10s first. Third graders are expected to divide within 100 fluently (Common Core 3.OA.C.7), and Texas asks them to recall the division facts that go with the multiplication facts to 10 × 10.

What it is good for

- The 2s, 5s and 10s, such as 35 ÷ 5.
- Dividing by 1, and a number by itself, such as 8 ÷ 8.
- The 3s and 4s, such as 24 ÷ 4.
- The 6s, 8s, 9s and 7s, such as 63 ÷ 9.

How to use it

1. Cut out one page at a time and start with the 2s, 5s and 10s.
2. Show a card. Your child says the answer, then turns it over to check.
3. Make two piles: the cards your child knows at once, and the ones that took a while.
4. Practice the slow pile for a few minutes a day, and add the next page when it is small.

> **Try saying:** “What times 8 makes 56?”

Tip: Use these after the multiplication cards for the same page are quick.
