Shape Hunt: Color the Shapes

Set A. Find every shape the picture asks for, and color it in.

Color every triangle

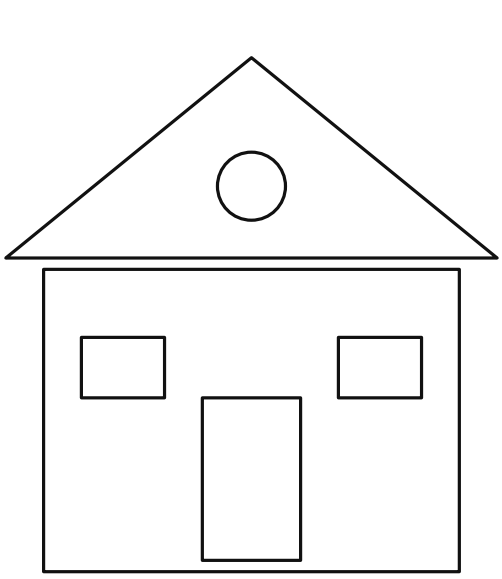

Color every circle

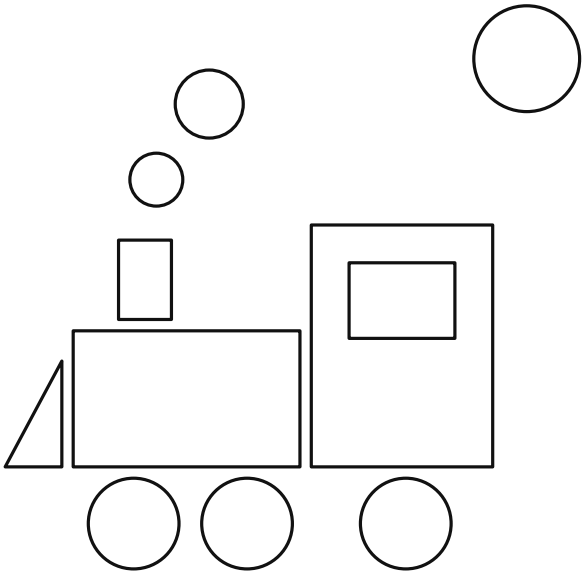

Shape Hunt: Color the Shapes

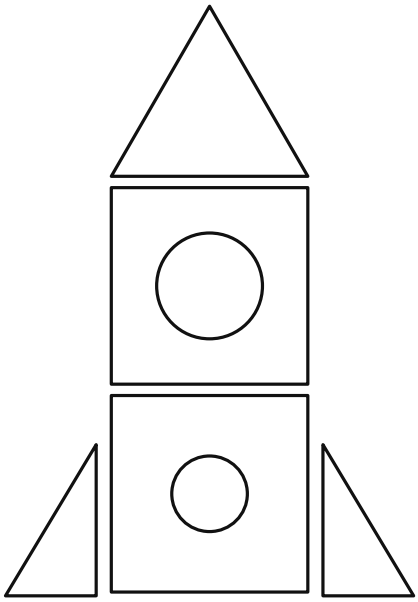

Set B. Find every shape the picture asks for, and color it in.

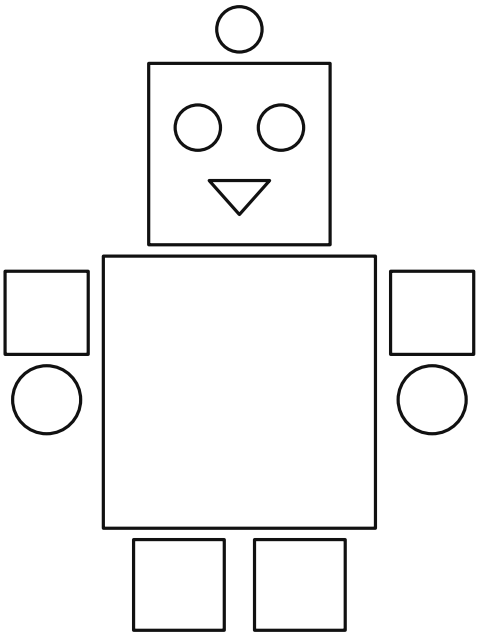

Color every rectangle 

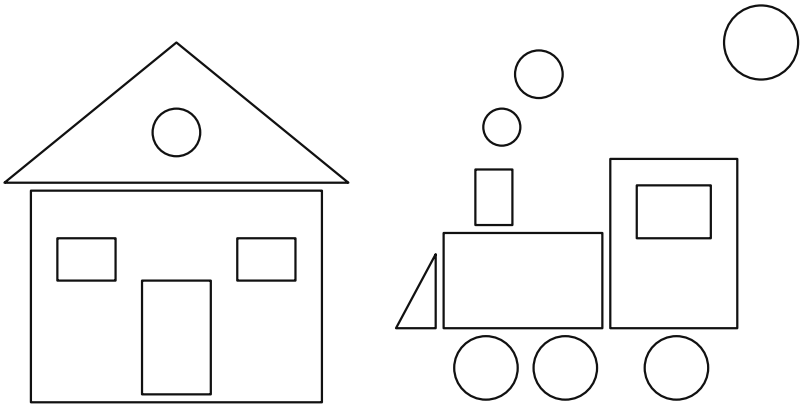

Color every square 

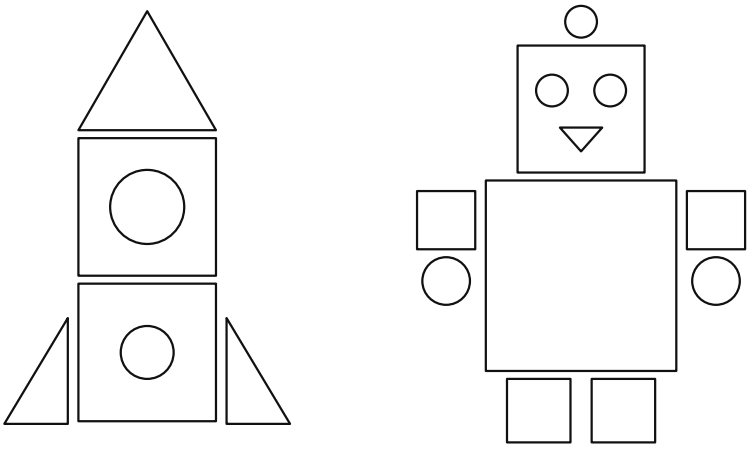

Shape Hunt: Count the Shapes

Set A. Count each kind of shape in the picture and write how many.

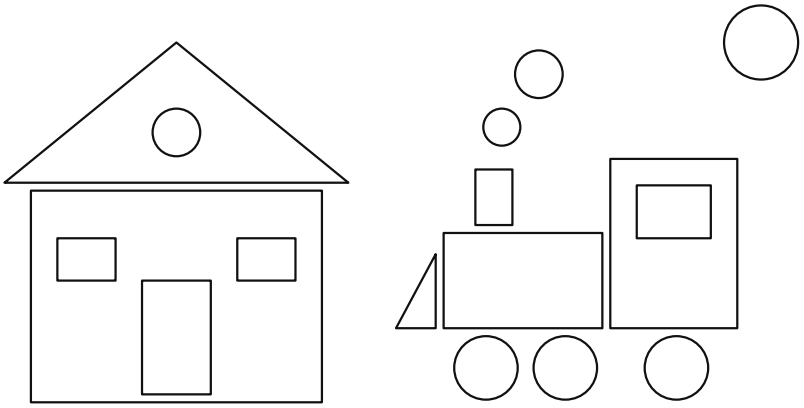

Shape	How many?
triangles	
rectangles	
circles	

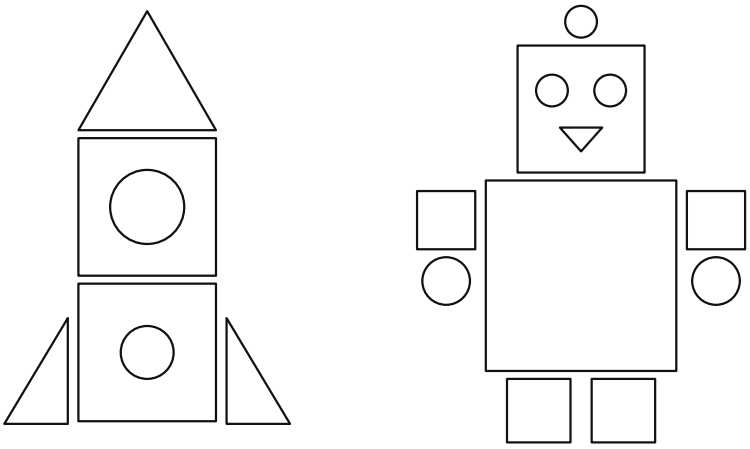

Shape	How many?
squares	
circles

Shape Hunt: Answer Key, Count Pages

For the grown-up. Each count is in red, in the box where your child writes it.

Page 3: set A

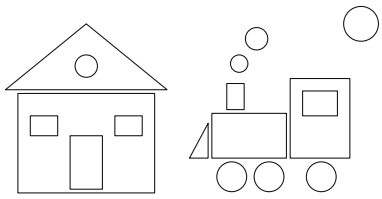

Shape	How many?
triangles	2
rectangles	8
circles	7

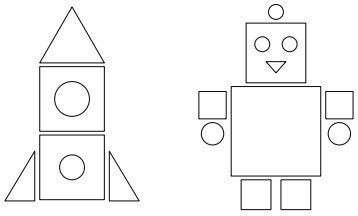

Shape	How many?
squares	8
circles	7
triangles	4

Page 4: set B

Shape	How many?
rectangles	8
circles	7
triangles	2

Shape	How many?
circles	7
squares	8
triangles	4

For Grown-Ups: How to Use These Worksheets

Two pictures made only of shapes. Each activity prints twice. For preschool and kindergarten.

Why use it

Children find shapes in the world around them before they name every one. These pictures are built from circles, triangles, squares, and rectangles, so finding one kind among the rest is the kindergarten skill of naming shapes in any position and size (Common Core K.G.A.1 and K.G.A.2). Counting each kind adds number practice.

What it is good for

- Spotting one kind of shape inside a picture.
- Counting each kind and writing how many.
- Talking about shapes in real things: a door, a wheel, a roof.

How to use it

1. Read the line above each picture and point at the shape it shows.
2. Your child colors every shape of that kind.
3. On the count pages, count each kind and write the number in its box.
4. Touch each shape as you count, so none is counted twice.
5. Check with the answer key, where the answers are in red.

> **Try saying:** “The wheels are circles. What other circles can you find?”

Tip: Afterward, hunt for the same shapes around the house: a window, a plate, a slice of toast.
